

Multimedia CD-ROM

This award-winning multimedia CD outlines the history of arctic peoples in Nunavut. It is a fabulous source of archaeological and traditional knowledge.

Books

Despite a broad interest in Inuit culture and history on the part of educators, northern residents and visitors to Nunavut, there exists a shortage of basic information on many aspects of Arctic archaeology. These two volumes, published by Parks Canada, are intended to present information on interesting archaeological topics that have relevance almost everywhere within Nunavut. Written to provide current archaeological information in terms understandable to non-specialists, they are designed to serve as a resource for educators and as a source of information for the large component of the general public with an interest in Nunavut archaeology.

Posters

The Inuit Heritage Trust has also produced five attractive full color posters illustrating photographs of archaeological specimens on the front, each with explanatory text on the back. Each poster highlights variations of the same cultural materials—harpoon heads, ulus (women's knives), inuksuit (rock figures), figurines and tiny illustrations of Inuit life rarely found by archaeologists. All of the posters except the ulus are the same size, 70cmx30cm. The ulu poster is 30cmx55cm.
